

Hard Surface Anti-Slip Treatments

Q: Is the anti-slip treatment effective when it is wet?

A: Yes. In fact, after the treatment, the surface is even more slip resistant when it is wet than when it is dry.

Q: Is there a warranty and how long does it last?

A: Yes we offer a **conditional warranty that is valid for TWO years** from installation date.

Treating the substrate with this treatment can & has easily remained effective for many years after warranty has expired

Q: How long do you have to wait before using or walking on the floor after the product is applied?

A: There is no dry time. The surface can be utilized immediately after the application is completed.

Q: How long has this process been utilized?

A: The manufacturer and creator of this system have been providing safe walking areas since 1986.

Q: Will the application process create major disruption and/or delays to the use of areas being treated?

A: There is minimal disruption as we normally work with the client to schedule for non-peak timing periods

There is no mess, no noise & no strong odors during the treatment in the event of unavoidable activities during operations

Q: Can the treatment be used on hardwood and vinyl floors?

A: No. Although we do have other solutions for these types of surfaces

Q: What surfaces cannot be treated with this technology?

A: Slate and painted surfaces

FAST FACTS

- This technology is not a coating so it will never peel or fade and will outlast competitive technology
- This process widens & deepens the pores below and at the surface. Micro-etched modification of tread design
- This treatment has been safely utilized globally to improve floor SCOF since 1986
- Approved by CFIA for non food contact areas
- Our system utilizes ASTM/NFSI B101.1 standards of SCOF evaluation
- This treatment is one of the most effective slip and fall incident reduction method
- Unsurpassed performance in wet conditions and will not retain dirt or grime
- Excellent tool to improve Loss Control Programs and reduce risk & incidents
- Pre and post treatment SCOF safety log/records are provided for clients records (documentation)
- Potential for liability insurance and WCB premium controls or reduction (contact your agents to discuss)
- We hold 5 million liability insurance policy and are in good standing with WCB(confirmation letters with contract)
- Past client references available on request

We evaluate to ASTM/NFSI B101.1 Standards
